- Navigate with GPS and Charts
- Use a Computer to Ease the Task

\$19⁹⁵

(model# WPCGPS)

*“GPS is a powerful tool, but it’s only as good as the charts you use with it. GPS by itself knows nothing of what’s around you. **How to Use GPS with Charts** is the take along ‘Quick Start’ guide that shows you how to navigate safely to your destination, and even how to check the GPS.”*

Robert A. Sweet, author of *GPS for Mariners*
